

SERVICE CENTER — Performance Intelligence System (PIS V4.0)

800CarGuru Sales Exchange Engine

Field	Value
Document Type	Service Center Dashboard Module — PIS V4.0
Delivery Date	March 30, 2026
Version	4.0.1 — Lead Distribution + AI Intelligence
Classification	CONFIDENTIAL — Internal Use Only

OVERVIEW

The Service Center module is a comprehensive Performance Intelligence System (PIS) built into the Global ERP platform. It provides real-time visibility into service advisor performance, lead management, revenue tracking, and AI-driven operational intelligence for the 800CarGuru service center operation.

The system pulls data from two sources:

- 1. **Legacy CarGuru2** — 433,512 leads, 324,624 estimates, 156,745 invoices (AED 100M+ revenue)
- 2. **Global ERP** — New leads, estimates, invoices, call sessions created through the ERP

All 22 Service Center Sales Department advisors are tracked with composite performance scores, commission calculations, and automated lead distribution.

13 DASHBOARD MODULES

#	Module	Route	Function
1	Master	/pis/master	8 KPI cards, FOC banner, 9-stage funnel, advisor leaderboard, 12 SLA measurements, AI Intelligence sidebar
2	Advisors	/pis/advisors	Full advisor table (22 advisors), V4 composite score formula with GP%, conversion rate, call quality, SLA compliance, tier classification (ELITE/STANDARD)
3	Lead Distribution	/pis/lead-distribution	Auto-assignment engine, score-ranked routing, tier cascade (10/7/5 min windows), accept timers, lock/release (120 min), penalty system, 60-lead live simulation
4	Funnel	/pis/funnel	9-stage mega funnel with volume, conversion %, SLA per gate, date range filter, stage-over-stage conversion analysis
5	Estimates	/pis/estimates	Approval rate, rejection value (AED), unapproved pipeline, pending > SLA, per-advisor breakdown

#	Module	Route	Function
6	WIP	/pis/wip	Active WIP, capacity, on-time %, pickup rate, zero-revenue WIP flagged
7	Collections	/pis/collections	Revenue/cost/GP, collection rate, DSO, overdue tracking, per-advisor GP%, date range filter
8	AI Engines	/pis/engines	All 7 AI engines: Funnel (e1), Agent Performance (e2), Revenue Forecasting (e3), Churn & Retention (e4), Anomaly Detection (e5), Collections (e6), Coaching (e7)
9	Signals	/pis/signals	Full signal library with observation, diagnosis, action, urgency (HIGH/MED/LOW), owner, confidence %. Filter by urgency level
10	Admin	/pis/admin	Score weights, commission rates, SLA thresholds, tier boundaries, lead distribution config, revenue targets — all editable JSON config
11	Advisor Extensions	/pis/extensions	Assign dialer extensions + location (inhouse/remote) for all service center advisors
12	Calls History	/pis/calls	Call history for all SC agents with 7 KPI cards (total, inbound, outbound, completed, missed, avg duration, answer rate), direction filter, AI Intelligence panel
13	Advisor Portal	/pis/advisor-portal	Per-advisor management with 4 tabs (Leads, Car-In, Customers, Calls), KPIs, search filter, AI Coaching panel

LEAD DISTRIBUTION ALGORITHM

1. New lead enters system → System ranks ALL advisors by composite score (descending)
2. Lead routes to #1 highest-score AVAILABLE advisor. Tier 1 (ELITE) gets first access
3. Accept window: Tier 1 = 10 min, Tier 2 = 7 min, Tier 3 = 5 min. Configurable in Admin
4. If not accepted within window → auto-cascade to next highest-score advisor. Penalty applied
5. Once accepted → Lead LOCKED for 120 min (or until first call logged). Zero overlap enforced
6. If no call logged within lock period → auto-release + 5-point score penalty. Lead re-enters queue
7. Max 5 cascade attempts before lead enters manual queue. Failed leads flagged to Ops Manager
8. 60-lead live simulation shows algorithm in action: acceptance, cascades, timeouts, failures, pipeline value
9. Commission engine integrated: base 3%, performance 5%, top 7-8%. GP floor enforced. FOC penalty applied
10. All distribution parameters configurable in Admin Panel

ADVISOR COMPOSITE SCORE — V4 FORMULA

The composite score determines advisor ranking, tier classification, lead priority, and commission rates.

Metric	Weight	Source
Conversion Rate	25%	leads closed_won / total leads
GP %	20%	(invoice revenue - estimate cost) / revenue
Revenue	15%	SUM(invoices.grand_total) normalized to 100K
SLA Compliance	15%	estimate approval rate
Customer Satisfaction	10%	call completion rate as proxy
Call Quality	10%	completed calls / total calls
FOC Penalty	-5%	% of zero-revenue invoices (negative weight)

Tier Classification:

- **ELITE** (score >= 30): First access to all leads, 10-min accept window, higher commission
- **STANDARD** (score < 30): Standard access, 5-7 min accept window, base commission

COMMISSION ENGINE

Tier	Base %	Performance %	Top %	GP Floor
STANDARD	3%	—	—	—
ELITE	3%	5%	7-8% (rank 1-3)	20% GP minimum

- FOC penalty: AED 500 per FOC unit deducted from commission
- Commission = (Revenue × Effective %) - FOC Deduction
- All rates configurable in Admin → Commission Rates

9-STAGE FUNNEL

Stage	Gate	SLA Target	Source
1	Lead Arrives	< 2 min	leads table
2	Assigned & Accepted	< 15 min	leads.agent_employee_id IS NOT NULL
3	First Contact	< 5 min post-accept	call_sessions joined to leads
4	Booking Confirmed	< 24h	leads.lead_status IN (accepted, car_in, closed_won)
5	Car-In	< 30 min of appointment	leads.checkin_at IS NOT NULL
6	Estimate Approved	< 30 min post check-in	estimates.status IN (approved, Invoiced)
7	WIP Complete	Per service SLA	work_orders.status = completed

Stage	Gate	SLA Target	Source
8	Invoice & Payment	< 30 min post-job	invoices table
9	Vehicle Pickup	Same day	gatepasses table

12 SLA MEASUREMENTS

#	SLA	Target	Source Engine
1	Lead arrival → assignment	< 2 min	Funnel Intelligence
2	Assignment → accept/decline	< 15 min	Funnel Intelligence
3	Accept → first contact	< 5 min	Funnel Intelligence
4	First contact → booking	< 24h	Funnel Intelligence
5	Booking → car-in on-time %	>= 80%	Funnel Intelligence
6	Car-in → estimate created	< 30 min	Funnel Intelligence
7	Estimate approval rate	>= 75%	Agent Performance
8	WIP job on-time completion	>= 85%	Anomaly Detection
9	Customer update if WIP delayed	100% notified	Anomaly Detection
10	Job complete → invoice	< 30 min	Agent Performance
11	Invoice paid → vehicle pickup	< 4 hours	Anomaly Detection
12	Invoice paid → post-sale follow-up	< 48 hr	Agent Performance

7 AI INTELLIGENCE ENGINES

Engine	Key	Function
Funnel Intelligence	e1	Conversion funnel analysis, drop-off detection, bottleneck identification
Agent Performance	e2	Per-advisor coaching signals, performance trends, improvement actions
Revenue Forecasting	e3	72h revenue forecast vs target, risk identification
Churn & Retention	e4	Customer churn prediction, retention signals
Anomaly Detection	e5	SLA breaches, unusual patterns, operational anomalies
Collections Intelligence	e6	Payment tracking, overdue alerts, collection optimization
Coaching Intelligence	e7	Personalized coaching plans, skill gap analysis

Each engine produces **Diagnostic** (what is happening), **Predictive** (what will happen), and **Prescriptive** (what to do) signals with urgency levels, confidence scores, owner assignment, and response deadlines.

8 MASTER KPIs

KPI	Source	Description
Total Revenue	invoices.grand_total	Total invoiced revenue for the period
Team GP%	(revenue - cost) / revenue	Gross profit margin across all advisors
Team FOC Rate	zero-revenue invoices / total	Free-of-charge rate (target < 30%)
Cars In MTD	leads.checkin_at count	Vehicles checked in month-to-date
Active WIP	work_orders not completed	Jobs currently in progress
Unapproved Est.	estimates not approved	Pipeline value at risk
Commission Pool	pis_commission_records	Total commission earned by team
Zero Revenue	advisors with AED 0	Advisors generating no billable revenue

DATABASE TABLES (PIS-Specific)

Table	Purpose
pis_config	Company-scoped JSONB configuration (score weights, commission rates, SLA thresholds, tier boundaries, lead distribution params)
pis_advisor_scores	Materialized composite scores per advisor per period
pis_lead_queue	Lead distribution routing queue with cascade tracking
pis_lead_queue_history	Audit trail of all routing decisions
pis_commission_records	Monthly commission calculations per advisor
pis_sla_snapshots	SLA compliance measurement snapshots

PERMISSIONS (11 Granular)

Permission Key	Description
pis.dashboard.view	View PIS master dashboard
pis.advisors.view	View advisor scores and leaderboard
pis.lead_distribution.view	View lead distribution queue
pis.lead_distribution.manage	Manage lead routing
pis.funnel.view	View funnel analytics
pis.estimates.view	View estimate pipeline
pis.wip.view	View WIP tracking
pis.collections.view	View collections and revenue

Permission Key	Description
<code>pis.engines.view</code>	View AI engines
<code>pis.signals.view</code>	View AI signals
<code>pis.admin.manage</code>	Manage PIS admin configuration

Auto-granted to `global_admin` and `company_admin` roles.

TECHNOLOGY STACK

Layer	Technology
Frontend	Next.js 16, React 19, Tailwind CSS
Backend	Next.js API Routes, PostgreSQL, postgres.js
AI	Anthropic Claude (via <code>@anthropic-ai/sdk</code>), 7 intelligence engines
Charts	recharts (installed, available for visualization)
Theme	Midnight Neon (dark), 5 themes available
Auth	Session-based, RBAC with granular permissions

KEY PRINCIPLE

Speed + performance = more leads. The system promotes and demotes without human intervention. Top performers get first access. Bottom performers get restricted access. Zero-revenue advisors get nothing.
