1. Overview

The Sales Center is the call center operations hub within the Global ERP. It manages inbound/outbound calls, customer assignments, agent performance tracking, and dialer integrations for the 800CarGuru team.

Who uses it:

- Call center agents (inbound/outbound)
- Call center supervisors
- Operations managers

Sidebar Location: Main → Sales Center

2. Accessing Sales Center

1. Log into Global ERP at your company URL
2. In the left sidebar, click **Sales Center** to expand the section
3. You will see 7 sub-pages:
 - Call History
 - Customers List
 - Data Center
 - User Extensions
 - Master Performance
 - Performance Summary
 - Agent Dashboard

Permissions Required: `callcenter.view` or specific sub-permissions (see each section below)

3. Call History

Path: Sales Center → Call History **Permission:** `callcenter.history.view`

What it shows:

- Complete log of all inbound and outbound calls
- Agent name, customer name, phone numbers
- Call status (completed, failed, cancelled, in_progress)
- Call duration
- Recording playback (if available)

How to use:

1. **Filter by direction:** Click "All", "Inbound", or "Outbound" tabs at the top
2. **View call details:** Each row shows time, direction, agent, from/to numbers, customer, status, and duration
3. **Play recordings:** Click the play button on calls that have recordings
4. **Add notes:** Click on a call row to expand and add notes about the call
5. **AI Inquiries tab:** Switch to see AI-analyzed call inquiries with verification status

KPI Bar:

- Total Calls, Inbound, Outbound, Completed, Missed, Avg Duration, Answer Rate
-

4. Customers List

Path: Sales Center → Customers List **Permission:** `callcenter.customers.view`

What it shows:

- All customers in the system
- Customer name, phone, email
- Assignment status (which agent owns the customer)
- Segment (CHSC, Non-CHSC, Insurance, Warranty)

How to use:

1. **Search:** Type in the search bar to find customers by name, phone, or email
 2. **Filter by segment:** Use the segment dropdown
 3. **Click to call:** Click the phone icon next to a customer to initiate an outbound call
-

5. Data Center

Path: Sales Center → Data Center **Permission:** `callcenter.datacenter.view`

What it shows:

- Customer assignment management dashboard
- KPI overview (total assigned, contacted, pending)
- Agent performance table with collection metrics

How to use:

Viewing KPIs:

1. Select date range using the date pickers
2. Filter by segment (CHSC, Non-CHSC, Insurance, Warranty, All)
3. KPIs update automatically

Auto-Assigning Customers:

1. Click "**Auto Assign**" button
2. Select the agent from the dropdown
3. Enter the number of customers to assign
4. Set percentage split by segment (must total 100%)
5. Click "**Assign**" to distribute

Agent Performance Table:

- Shows per-agent: Total Assigned, Total Leads, Total Collection, Total Calls, Answer Rate, Performance Score
- Click column headers to sort

Exporting Reports:

- Click "**Export**" → Choose Excel or PDF format
-

6. User Extensions

Path: Sales Center → User Extensions **Permission:** `callcenter.extensions.view`

What it shows:

- List of all agents with their dialer extensions
- Extension number and location (inhouse/remote)

How to use:

1. Find the agent in the list
2. Enter or modify the **Extension** number (e.g., 1001)
3. Select **Location** (Inhouse or Remote)
4. Click "**Save**" to apply changes

The extension is used for the Linkus dialer integration to route calls to the correct agent.

7. Master Performance

Path: Sales Center → Master Performance **Permission:** `callcenter.master_performance.view`

What it shows:

- Executive-level performance dashboard
- Top KPIs: Revenue, Bookings, Calls, Show-up Rate
- Inbound/Outbound metrics with trends
- Team stats by location (Inhouse vs Remote)
- Portfolio metrics with top performers
- Conversion funnel (Calls → Leads → Bookings → Show-ups → Revenue)

How to use:

1. Set the date range using from/to date pickers
 2. Optionally filter by branch
 3. Review the KPI cards for overall performance
 4. Scroll down for detailed breakdowns by category
-

8. Performance Summary

Path: Sales Center → Performance Summary **Permission:** `callcenter.view`

What it shows:

- Summary view of call center performance
- Agent rankings and scores
- Call volume and quality metrics

How to use:

1. View the overview dashboard
 2. Check agent rankings
 3. Review performance trends
-

9. Agent Dashboard

Path: Sales Center → Agent Dashboard **Permission:** `callcenter.view`

What it shows:

- Per-agent view with call history and customer assignments
- KPI cards (Assigned, Contacted, Pending, Total Calls, Answer Rate, Avg Duration)
- Two tabs: Call History and Customers

How to use:

For Supervisors:

- 1. Select an agent from the dropdown at the top right
- 2. View their KPIs, call history, and customer list
- 3. Toggle **AI Coaching** to see AI-generated performance signals

For Agents:

- 1. Dashboard automatically shows your own data
- 2. Review your call history in the Calls tab
- 3. Check your assigned customers in the Customers tab
- 4. Filter customers by segment (All, CHSC, Non-CHSC, Insurance)
- 5. Click a customer's phone number to initiate a call

AI Coaching Panel:

- 1. Click "**AI Coaching**" button to toggle the AI panel
- 2. View Diagnostic, Predictive, and Prescriptive signals
- 3. Signals come from Engine e2 (Agent Performance) and e7 (Coaching)

Troubleshooting

Issue	Solution
Can't see Sales Center	Check that your role has <code>callcenter.view</code> permission
Call history empty	Verify dialer integration is configured in Settings
Extension not saving	Ensure you have <code>callcenter.extensions.view</code> permission
No customers showing	Contact admin to run customer assignment
