

Advisor Portal -- Business Documentation

Purpose

The Advisor Portal is the primary workspace for **Service Center Sales Advisors** to manage their assigned vehicle service leads from check-in to delivery. It provides a single view of all active jobs, performance metrics, and action buttons to complete each workflow step.

Business Value

Benefit	Description
Single Dashboard	Advisor sees everything in one place -- no switching between pages
Auto-Assignment	Leads are automatically assigned based on performance score
Real-Time Updates	Dashboard refreshes every 5-30 seconds
Performance Tracking	KPIs visible at all times (revenue, calls, conversions)
Faster Turnaround	One-click actions for each workflow step
Accountability	Every action is logged with timestamps

Advisor Responsibilities

Daily Duties

#	Duty	When	Action
1	Accept new leads	When offered by system	Accept within time window (5-10 min based on tier)
2	Review car check-in	When car arrives	Verify photos, media, customer details
3	Monitor inspection	After check-in	Track inspection status, review findings
4	Review estimate	After inspection	Verify pricing, approve items, set service charges
5	Track parts	After estimate approval	Monitor part quotes, PO, delivery status
6	Monitor job card	During work	Track job progress, final inspection, car wash
7	Create invoice	After job completion	Add service charges, review totals, convert
8	Collect payment	After invoice	Top up wallet, process payment
9	Release car	After payment	Create gatepass, confirm handover

Workflow Stages

Lead Offered → Accept → Car Check-In → Inspection → Estimate →
Parts Approval → Procurement → Job Card → Quality Check →
Car Wash → Invoice → Payment → Gatepass → Car Release

Stage Details

1. Lead Acceptance

- System auto-assigns based on **PIS composite score** (7 metrics)
- Advisor has limited time to accept (tier-based: 5/7/10 minutes)
- If not accepted: 5-point penalty + cascades to next advisor
- After 5 cascades: escalated to manual queue for manager

2. Pre-Inspection & Check-In

- Customer submits pre-inspection form (8 questions + signature)
- Workshop staff performs car check-in (4 photos + cluster + 360 video)
- Lead status changes to **car_in**
- Auto-triggers advisor assignment

3. Inspection

- Inspector adds findings (parts/services needed)
- Each finding has: action (Replace/Service/Repair), priority, media evidence
- AI suggests related parts
- Inspection completed and PDF generated

4. Estimate & Approval

- Estimate created from inspection findings
- Pricing set for each item (OE/OEM/Aftermarket/Used)
- Customer approval link generated and shared
- Customer reviews, selects items, signs digitally

5. Parts & Procurement

- Vendor quotes requested for approved parts
- Vendor submits pricing + enters part number and diagram
- Purchase order created and issued
- Parts received at main warehouse → transferred to workshop
- GRN recorded with inventory movement

6. Job Card Execution

- Job card created from approved estimate
- Stages: Quote Accept → Collect Car → Pre-Work Check → Start → Evidence → Complete
- Final inspection: checklist (test drive, cluster, tyre, computer reset, shields)

- Car wash: upload 5 media (front, rear, right, left, video)

7. Invoice & Payment

- Invoice created with:
 - Parts subtotal (from estimate)
 - Service charges (inspection fee, labour charge, recovery fees)
 - Discount (amount or percentage)
 - VAT (5%)
 - Grand total
- Payment via customer wallet
- Auto-settlement if wallet has sufficient balance

8. Car Delivery

- Gatepass created from paid invoice
- Supervisor approval
- Customer signature
- Car released
- Lead closed as closed_won

KPIs Tracked

Performance Metrics (8 KPIs)

KPI	Description	Target
Total Leads	All leads assigned to advisor	Growth
Converted	Leads converted (closed_won/completed)	> 80%
Car-In	Active cars in workshop	Monitor
Car-Out	Cars delivered to customers	Growth
Today Collection	AED collected today	Daily target
Total Revenue	All-time revenue generated	Monthly target
Total Calls	Phone calls made/received	Activity target
Answer Rate	% of calls answered	> 80%

Scoring Weights

Metric	Weight	Impact
Conversion Rate	25%	Most important
Gross Profit %	20%	Profitability
Revenue	15%	Volume

Metric	Weight	Impact
SLA Compliance	15%	Timeliness
Customer Satisfaction	10%	Quality
Call Quality	10%	Communication
FOC Penalty	-5%	Negative impact

Tier System

Tier	Score Range	Benefits
ELITE	80-100	10 min accept window, priority leads, 5-8% commission
STANDARD	50-79	7 min accept window, 3-5% commission
LOW	0-49	5 min accept window, 3% base commission

Service Charges

Managed by admin, editable by advisor before invoice conversion:

Charge	Default (AED)	When Applied
Inspection Fee	150	Always
Recovery Pickup Fee	200	If pickup recovery requested
Recovery Dropoff Fee	200	If dropoff recovery requested
Labour Charge	0	Configurable per job

Revenue Flow

Parts Sale (from estimate)

- + Inspection Fee
- + Labour Charge
- + Recovery Fees (if applicable)
- = Subtotal
- Discount
- = Net Subtotal
- + VAT (5%)
- = Grand Total (Invoice Amount)

Customer pays from Wallet → Invoice marked Paid → Car Released

Commission Structure

Level	Base	Performance	Top 3 ELITE
Rate	3%	+2% (ELITE)	+5% (rank <= 3)
Requirement	All	Score >= 80	Score >= 80, GP% >= 20%
FOC Deduction	—	—	AED 500 per FOC unit

Escalation Rules

Scenario	Action	Owner
Lead not accepted (5 timeouts)	Escalate to manual queue	Branch Manager
Wallet insufficient	Advisor prompts topup	Advisor
Parts delayed	Visible in parts order column	Advisor + Procurement
Quality check failed	Job card reopened for rework	Advisor + Technician
Customer complaint	Logged in lead events	Advisor + Manager

Reports Available

Report	Access	Format
Inspection Report	PDF button in inspection column	PDF
Estimate Quote	Print buttons in estimate page	PDF
GRN Report	GRN PDF button in procurement	PDF
Invoice	Print button in invoice	PDF
QC Report	View QC Report modal	On-screen
