

Global ERP -- Full Flow Business Documentation

Workshop Service Lifecycle: Lead to Car Delivery

Version: 2.0 | Updated: 2026-03-31

Business Overview

Global ERP manages the complete vehicle service lifecycle through 11 connected stages. Every step is tracked, measured, and auditable.

The 11 Stages

Stage 1: Lead Creation & Booking

Who: Sales Agent / Call Center **Purpose:** Register customer inquiry and schedule appointment

Action	Outcome
Create lead (Workshop/RSA/Recovery)	Lead record with customer + car
Create booking (Walk-in/Recovery)	Appointment scheduled, pre-inspection form sent
Customer submits pre-inspection form	8 questions + digital signature
Car check-in (at workshop)	4 photos + cluster + 360 video captured

Revenue Impact: None yet -- opportunity created

Stage 2: Advisor Assignment

Who: System (automatic via PIS) **Purpose:** Assign best-performing advisor to the lead

Action	Outcome
System scores all advisors (7 metrics)	Ranked by composite score
Top advisor gets offer with countdown	5/7/10 min based on tier
Advisor accepts	Lead assigned, 120-min lock
Advisor times out	5-point penalty, next advisor gets offer
5 timeouts	Escalated to manual queue (branch manager)

Revenue Impact: Better advisors = higher conversion + profit

Stage 3: Inspection

Who: Inspector / Technician **Purpose:** Assess vehicle condition and identify work needed

Action	Outcome
Collect car media review	Verify check-in photos match car
Process checks (Oil/Battery/Tyre/OBD)	Condition assessment with photos
Vehicle data entry	VIN decode, make/model/year, tyre sizes
Add findings (parts/services)	Each with action, priority, evidence
Complete inspection	PDF report generated

Revenue Impact: Findings drive estimate value

Stage 4: Estimate & Approval

Who: Advisor + Customer **Purpose:** Quote the work and get customer approval

Action	Outcome
Create estimate from inspection	All findings priced (OE/OEM/AFTM/Used)
AI market pricing analysis	Competitive pricing verification
Generate customer approval link	7-day expiry, shareable
Customer reviews + selects items	Chooses preferred part types
Customer signs + accepts terms	Estimate approved

Revenue Impact: Approved estimate = committed revenue

Stage 5: Parts Approval & Vendor Quotes

Who: Procurement + Vendor **Purpose:** Source parts at best price and quality

Action	Outcome
Send inquiry to vendors	Request quotes for approved parts
Vendor submits quote (4 types)	OEM/OE/Aftermarket/Used prices
Vendor enters part number + diagram	Required before order processing
System selects optimal vendor	Based on quality/price/reliability score
Parts approved for ordering	Ready for purchase order

Revenue Impact: Cost control → gross profit

Stage 6: Procurement & Receiving

Who: Procurement + Warehouse **Purpose:** Order parts, receive delivery, manage inventory

Action	Outcome
Create purchase order	Items, quantities, vendor, costs
PO approved and issued	Sent to vendor
Vendor delivers parts	Physical delivery
Record goods receipt (GRN)	Stock into Main Warehouse
Transfer to workshop branch	Stock available for job
Accounting journal posted	Inventory ↑, AP ↑

Revenue Impact: Parts cost recorded, inventory valued

Stage 7: Job Card Execution

Who: Technician + Advisor **Purpose:** Execute the repair/service work

Stage	Required Actions
Quote Accepted	Verify quote is accepted/verified
Collect Car	Review media, verify condition
Pre-Work Check	Record mileage, confirm car details
Parts Receive	At least 1 part received, photos uploaded
Start Job	Begin work execution
Evidence Upload	Working video, completion evidence
Completed	Mark job done
Final Inspection	Checklist (6 items) + 4 car photos
Car Wash	5 media files (front/rear/right/left/video)

Revenue Impact: Labour hours, parts consumed

Stage 8: Invoice & Service Charges

Who: Advisor **Purpose:** Bill the customer with all charges

Line Item	Source	Editable
Parts (from estimate)	Approved items with pricing	No (set in estimate)
Inspection Fee	Admin config (default AED 150)	Yes (by advisor)
Labour Charge	Admin config (default AED 0)	Yes (by advisor)

Line Item	Source	Editable
Recovery Pickup Fee	Admin config (default AED 200)	Yes (if applicable)
Recovery Dropoff Fee	Admin config (default AED 200)	Yes (if applicable)
Discount	Amount or percentage	Yes
VAT	5% on net total	Auto-calculated

Invoice = Parts + Service Charges - Discount + VAT

Revenue Impact: Total billable amount confirmed

Stage 9: Payment & Collections

Who: Advisor / Cashier **Purpose:** Collect payment from customer

Method	Process
Wallet	Deduct from customer wallet balance
Cash	Record cash payment with proof
Card	Record card payment with proof
Bank Transfer	Record transfer with proof

Wallet Topup Flow:

1. Advisor clicks "Top Up" in advisor portal
2. Enters amount, payment method, date, uploads proof
3. Wallet balance increases immediately
4. Payment can then be processed from wallet

Auto-Settlement: If wallet balance $\geq$ invoice total, auto-pay on invoice creation

Revenue Impact: Cash collected, revenue recognized

Stage 10: Gatepass & Car Release

Who: Advisor + Supervisor **Purpose:** Formally release car to customer

Step	Action	Required
Create gatepass	From paid invoice	Invoice must be paid
Supervisor approval	Timestamp recorded	Yes
Customer signature	Signed handover	Yes
Final notes	Handover remarks	Optional
Release car	Status → released	Closes lead

Revenue Impact: Service completed, lead closed as closed_won

Stage 11: Post-Delivery

Who: System **Purpose:** Close the loop, update metrics

Action	Automatic
Lead closed as closed_won	Yes (on gatepass release)
closed_at timestamp set	Yes
Advisor KPIs updated	Yes (conversion, revenue)
Car-Out tab populated	Yes
Customer history updated	Yes

Financial Summary Per Job

REVENUE:	
Parts Sale:	AED xxx.xx
Inspection Fee:	AED 150.00
Labour Charge:	AED xxx.xx
Recovery Fees:	AED xxx.xx (if applicable)
Subtotal:	AED xxx.xx
Discount:	-AED xxx.xx
VAT (5%):	AED xxx.xx
GRAND TOTAL:	AED xxx.xx
COST:	
Parts Cost:	AED xxx.xx (from PO)
Labour Cost:	AED xxx.xx (internal)
TOTAL COST:	AED xxx.xx
GROSS PROFIT:	
GP%:	AED xxx.xx (Revenue - Cost) xx.x%

KPI Dashboard (8 Metrics)

KPI	Description	Target
Total Leads	Leads assigned	Growth
Converted	Closed won	> 80% conversion

KPI	Description	Target
Car-In	Active in workshop	Monitor throughput
Car-Out	Delivered	Growth
Today Collection	AED collected today	Daily target
Total Revenue	All-time revenue	Monthly target: AED 2M
Total Calls	Calls made/received	Activity metric
Answer Rate	Calls answered %	> 80%

Roles & Permissions

Role	Key Actions
Advisor	Accept leads, monitor workflow, create invoices, collect payment, release cars
Inspector	Perform inspections, add findings, upload evidence
Technician	Execute job card, upload evidence, complete work
Procurement	Manage POs, receive parts, track inventory
Vendor	Submit quotes, enter part details, manage deliveries
Branch Manager	Escalation handling, manual assignments, oversight
Admin	Configure service charges, PIS settings, permissions
